

First is to apply the patch (you will need a CIA of the game and Delta Patcher):

- Download Delta Patcher.
- Copy both the xdelta and the CIA file in the Delta Patcher folder.
- Open original file (Sumikko Gurashi CIA).
- Open delta patch (.xdelta file).
- Next to apply patch, click the small icon, uncheck Checksum validation and check Backup original file.
- Press apply patch.
- A sumikkoPatched.cia is created, this is the file you need to rename to 00152A00.romfs.

Method 1 - Using dnasdw's 3dstool:

- Copy 00152A00.romfs in to the same folder as 3dstool.
- Open cmd.exe and run `3dstool -xvtf romfs 00152A00.romfs --romfs-dir romfs`
- Wait for the romfs folder to generate.
- Copy the romfs folder into luma/titles/<titleid>/.
- Enable game patching on your 3DS (hold Select on boot).
- Install Sumikko Gurashi CIA and launch the game.

Method 2 - Using HackingToolkit3DS:

- Download HackingToolkit3DS and run it.
- Enter RFSE to open RomFS Extractor.
- Press Open, choose the .romfs file and press Go.
- Wait for the folder to generate.
- Rename the folder to romfs, copy the folder into luma/titles/<titleid>/.
- Enable game patching on your 3DS (hold Select on boot).
- Install Sumikko Gurashi CIA and launch the game.

Method 3 - Using GodMode9:

- Copy the .romfs file to your SD card, and open it with GodMode9:
 - Boot your console while holding Start to launch Godmode9.
 - Navigate to your game file inside the [0:] SDCARD drive.

Press A on the game file.

Select <type> image options..., then select Mount image to drive.

Press A to enter the drive.

Press A on files or R+A on folders (use L to mark multiple) you want to dump, then select Copy to /gm9/out.

Your files will be in the /gm9/out folder on the SD card.

- Create a romfs folder in luma/titles/<titleid>/, and copy all the extracted contents to the romfs folder.
- Enable game patching on your 3DS (hold Select on boot).
- Install Sumikko Gurashi CIA and launch the game.
